Scene Problem on the Construction Site

- Inspector: Stop right there! There's a problem with the electrical installation.
- Electrician: What's wrong? I'm following the blueprint exactly.
- Inspector: Yes, but according to regulations, the electrical conduits must be farther from the water pipes.
- Architect: We can make an adjustment here and relocate the wiring without affecting the structure.
- Master Mason: Alright, I'll have the workers modify the conduit placement right away.
- Worker: No problem, but we'll need more materials to make the changes.
- Administrator: I'll handle that.
- Electrician: So, we can continue the installation?
- Inspector: Exactly.
- Master Mason: Alright team! Let's solve this quickly.
